Summary:

I am a skilled front-end developer with expertise in React.js and Tailwind CSS. Passionate about seeking new challenges for enhancing my technical skills and trying to implement them efficiently. My aim is to collaborate with a dynamic team to give the best user experience to the users and make the best web applications.

Skills

Expertise: HTML5, CSS3, Tailwind CSS, Bootstrap, React.js, REST API, React Router

Comfortable: JavaScript, ES6, Express.js, Firebase authentication, MongoDB CRUD operation

Tools: Git, VS Code, GitHub, Netlify, Firebase, Vercel, npm packages

Extra Skills

Interpersonal Skills: Team Player | Communication | Hard Working

Extra Skills: Figma Design

Projects

1. Sports Toys House || HTML5, Tailwind CSS, React.js, React Router, Express.js, MongoDB

Tools: Git, VS Code, GitHub, Firebase, Vercel, npm packages

Features:

- ❖ It's a fully mobile, tab and desktop responsive website.
- ❖ Only authentication users can add, edit, delete and view their toys and also can view the product details page.
- ❖ Routes are secured. Only authentication users can see home, blog, all-toys, add toys and my toy routes otherwise we can see only home, blog and all-toys these three routes.

2. The Recipe Room || HTML5, Tailwind CSS, React.js, React Router, Express.js

Tools: Git, VS Code, GitHub, Firebase, Vercel, npm packages

Features:

- ❖ Find Chefs, Figure out their most liked recipes, Read about those recipes.
- ❖ Recipes are protected route (after login you can go to those pages)
- ❖ Login and logout system with firebase authentication
- ❖ Download Blog details in PDF format and User profile

3. Staffing Agency || HTML5, Tailwind CSS, React.js, React Router, Vite

Tools: Git, VS Code, GitHub, npm packages

Features:

- ❖ At first, the featured section will show the first four job cards containing all the information and see all jobs button at the bottom of these cards.
- ❖ Clicking on the View Details button will redirect the user to the /job/:id route where he/she will see a banner and all the details
- ❖ Create an Applied Jobs page showing all the applied jobs in a tabular/list view.
- ❖ Create a statistics page. It cannot be a simple line/bar chart. The chart will be based on the assignment marks (all the marks you got so far) against the assignment number.
- ❖ Create a 404 page
